Sample Gizmo Half-Life Questions and Answers

Here are some typical questions with their corresponding answers to illustrate the kind of data you might analyze:

1. **Question:** If a sample starts with 100 grams of a radioactive isotope and its half-life is 10 hours, how much remains after 30 hours?
2. **Answer:** After 30 hours, three half-lives have passed (since $30/10 = 3$). The remaining amount is calculated as:
 1. Initial amount: 100 grams
 2. After 1 half-life: 50 grams
 3. After 2 half-lives: 25 grams
 4. After 3 half-lives: 12.5 grams

So, approximately 12.5 grams remain.

3. **Question:** How can you determine the half-life from experimental data?
4. **Answer:** By measuring the time it takes for the sample to reduce to half of its initial amount, or by analyzing decay data to identify the time interval over which the quantity halves, you can determine the half-life.

Common Types of Gizmo Half-Life Questions and Their

Solutions Basic Calculation Problems Example: A radioactive isotope has a half-life of 10 hours. How much of a 100-gram sample remains after 30 hours? Solution Approach: - Determine the number of half-lives passed: $30 \text{ hours} / 10 \text{ hours} = 3 \text{ half-lives}$ - Calculate remaining amount: $100 \text{ grams} / 2^3 = 100 \text{ grams} / 8 = 12.5 \text{ grams}$ Answer: 12.5 grams remain after 30 hours. Graph Interpretation Tasks Example: Given a decay curve, estimate the half-life based on the graph. Solution Approach: - Identify the initial quantity at time zero - Find the point where the quantity is half of the initial - Note the corresponding time on the x-axis Tip: Use the answer key to verify your estimated half-life and understand how to interpret decay curves accurately. Conceptual Understanding Questions Example: Explain why the rate of decay slows down over time. Solution: Because each half-life reduces the remaining radioactive material by half, the absolute amount decreases, leading to a decreasing decay rate over time, even though the proportional rate remains constant.
