Complementary Role with Therapy

Trauma worksheets are most effective when used alongside professional therapy, such as trauma-focused cognitive-behavioral therapy (TF-CBT), eye movement desensitization and reprocessing (EMDR), or somatic therapies. They serve as homework assignments, reinforcing skills learned during sessions and encouraging ongoing reflection.

Factors to Consider

Choose resources relevant to your experience. - Expert-Designed vs. Self-Help: Therapist-designed worksheets tend to be more comprehensive and safe, but there are reputable self-help options. - Ease of Use: Ensure instructions are clear and exercises manageable within your current emotional state. - Support Availability: Consider whether you will have access to therapeutic guidance or peer support while working through the worksheets.
