What is an Evolution Webquest?

Definition and Core Concept

An Evolution Webquest is an inquiry-oriented online learning activity that guides students through a series of carefully curated web-based resources to explore the principles, mechanisms, and evidence of biological evolution. Unlike traditional textbook-based learning, a webquest emphasizes active engagement, critical thinking, and collaborative exploration, encouraging learners to construct their own understanding through research and analysis. Webquests typically consist of structured steps that include tasks, process descriptions, resources, and evaluation criteria. When tailored to evolution, these components focus on topics such as natural selection, genetic drift, speciation, fossil evidence, molecular biology, and evolutionary debates.

Historical Development and Rationale

The concept of the webquest was pioneered in the mid-1990s by Bernie Dodge and Tom March at San Diego State University as a response to the need for more interactive, student-centered online learning experiences.
