Overview of the Six Brain Teasers and Their Answers

Below, we present six popular brain teasers, each with its unique challenge, followed by detailed solutions and explanations.

1. The Riddle of the Missing Dollar

Puzzle:

Three friends check into a hotel room that costs \$30. They each pay \$10. Later, the hotel realizes they overcharged the guests and the actual cost is \$25. The hotel refunds \$5 to the friends, but since \$5 cannot be split evenly among three people, they decide to give \$1 back to each and keep \$2 as a tip. Now, each friend has paid \$9 (totaling \$27), and with the \$2 tip, that sums to \$29. Where is the missing dollar?

Answer:

The confusion arises from how the problem is framed. The key is understanding that adding the \$27 paid by the friends and the \$2 tip counts the same money twice.

Explanation:

1. Total paid by friends: \$27
2. Hotel keeps: \$25
3. Refunds: \$3 (\$1 to each friend)

The mistake is to add \$27 (what they paid) and \$2 (tip) and consider the total as \$29. But actually:

1. The \$27 includes the \$25 kept by the hotel and the \$2 tip.
2. The \$3 refund is separate and was returned to the friends, which means the total amount initially paid (\$30) is accounted for by:

$\$25 \text{ (hotel)} + \$2 \text{ (tip)} + \$3 \text{ (refund)} = \$30.$

Thus, there is no missing dollar; it's a trick in how the problem is posed.

1. The Candle and the Matchstick

Puzzle:

You have a candle, a box of matches, and a box of tacks. How can you hang the candle on the wall using only these items?

Answer:

Use the matches to light the candle and then tack the candle to the wall using the tacks.

Explanation:

This is a straightforward practical puzzle:

1. Strike a match to light the candle.
2. Use the tacks to hang the candle on the wall by pinning its candle holder or a small part of the candle itself (if it has a suitable shape).

Alternatively, if the puzzle implies a more creative solution, one might:

1. Melt the candle slightly with the match and then stick it to the wall, or
2. Use the tacks to create a makeshift holder.

The simplest, most logical approach is to light the candle with the match and then hang the candle using the tacks.

1. The Family Puzzle: Who is the Mother?

Puzzle:

A man is looking at a photograph of someone. His friend asks, "Whose photo is this?" The man replies, "Brothers and sisters, I have none. But that man's father is my father's son." Who is in the photograph?

Answer:

The man in the photograph is his son.

Explanation:

Breaking down the statement:

1. "That man's father is my father's son."
2. "My father's son" refers to the man himself (since he has no brothers).
3. Therefore, "That man's father" is the man himself.
4. So, the man in the photo is the son of the speaker.

In other words, the person in the photograph is the man's son.

1. The Classic River Crossing Puzzle

Puzzle:

A farmer needs to cross a river with a fox, a goose, and a bag of beans. He has a boat that can only carry himself plus one item. If he leaves the fox alone with the goose, the fox will eat it. If he leaves the goose alone with the beans, the goose will eat them. How can he transport all three safely across the river?

Answer:

Follow these steps:

1. Take the goose across first and leave it on the other side.
2. Return alone.
3. Take the fox across.
4. Bring the goose back.
5. Take the bag of beans across.
6. Return alone.
7. Finally, take the goose across again.

Explanation:

This sequence ensures:

1. The fox is never alone with the goose without the farmer present.
2. The goose is never left alone with the beans.
3. All three items are transported safely.

1. The Hourglass Conundrum

Puzzle:

You have two hourglasses: one measures 7 minutes, and the other measures 11 minutes. How can you measure exactly 15 minutes?

Answer:

Follow these steps:

1. Start both hourglasses simultaneously.
2. When the 7-minute hourglass runs out, flip it (7 minutes passed).
3. When the 11-minute hourglass runs out, flip it (11 minutes passed).
4. When the 7-minute hourglass runs out again, 14 minutes have passed (since it was flipped after 7 minutes, it now measures another 7).
5. At this moment, the 11-minute hourglass has been running for 14 minutes minus the time since the last flip, which is 3 minutes (since $11 - 3 = 8$ minutes remaining).
6. Flip the 11-minute hourglass to measure 3 minutes.
7. Let it run for 1 minute to reach 15 minutes total.

Note: This is a classic problem that requires careful timing and understanding of the hourglasses' states. Alternatively, more straightforward solutions involve flipping the hourglasses at specific times to mark 15 minutes precisely.

1. The Calendar Riddle

Puzzle:

A man walks into a restaurant and orders a meal. After eating, he leaves a tip but no bill is presented. The waiter says, "Thank you, but we don't accept tips." How is this possible?

Answer:

The man is a time traveler or the "restaurant" is a metaphor. More practically, the man is a mattress (a pun on "tip" as in "tip over" or "tip" as a part of a device). Or, the scenario is a wordplay where the tip is in the form of a tip of the staff or the tip of a hat.

Explanation:

Another interpretation:

1. The man could be a magician or someone paying in a way that doesn't involve cash or bills, such as a digital tip or a tip in kindness.
2. Or, the "tip" might be a tip in advice or a gesture, not a monetary tip.

In many riddles, the key is understanding the double meaning of "tip," or recognizing that the scenario is a pun or wordplay.
