It encompasses a wide range of activities, from raising capital to budgeting, investing, and managing financial risks.

Key Concepts in Corporate Finance

Understanding the core ideas of corporate finance will help you grasp how companies make financial decisions and allocate resources effectively.

1. Capital Budgeting

Capital budgeting is the process of evaluating and selecting long-term investments that will benefit the company. Think of it as planning big projects or purchases, like building a new factory or launching a product line.

1. **Why it matters:** Ensures the company invests in projects with positive returns.
2. **How it's done:** Using tools like Net Present Value (NPV), Internal Rate of Return (IRR), and Payback Period to assess potential investments.

2. Capital Structure

Capital structure refers to how a company finances its operations and growth through different sources of funds.

1. **Debt:** Borrowed funds, such as loans or bonds.
2. **Equity:** Funds raised by issuing shares of stock.

The right mix of debt and equity — known as the company's leverage — influences profitability and risk.

3. Working Capital Management

Working capital is the money a company uses for its daily operations. Managing it effectively ensures smooth functioning without cash shortages.

1. **Components:** Current assets (cash, inventory, receivables) and current liabilities (payables, short-term debt).
2. **Goal:** Maintain enough liquidity to meet short-term obligations while optimizing resources for growth.

Financial Statements Every Beginner Should Know

Financial statements provide a snapshot of a company's financial health and are vital tools in corporate finance.

1. Balance Sheet

Shows the company's assets, liabilities, and shareholders' equity at a specific point in time.

1. **Assets:** What the company owns (cash, inventory, property).
2. **Liabilities:** What the company owes (loans, accounts payable).
3. **Equity:** The owners' claim after liabilities are deducted from assets.

2. Income Statement

Details revenues, expenses, and profits over a period.

1. **Revenue:** Income from sales or services.
2. **Expenses:** Costs of operations, wages, materials.
3. **Net Income:** Profit or loss after expenses.

3. Cash Flow Statement

Tracks the inflow and outflow of cash in three areas: operating, investing, and financing activities.

3. **Financing Cash Flow:** Cash raised from or paid to investors and lenders.
