It emphasizes that strategic positioning is crucial for gaining sustainable competitive advantage and discusses how digital innovation can shift industry boundaries and redefine competitive spaces.

Internal Capabilities and Core Competencies

The Resource-Based View (RBV) continues to be a central theme, highlighting that a firm's unique resources and capabilities underpin its competitive advantage. The 11th edition emphasizes dynamic capabilities—an extension of RBV—focusing on how firms develop, adapt, and reconfigure resources in response to environmental changes. This shift underscores the importance of organizational agility in the digital age.

One of the most significant updates in this edition is the integration of digital strategy. The authors explore how digital technologies—such as artificial intelligence, big data analytics, blockchain, and cloud computing—are reshaping industries. They analyze how firms can leverage digital innovations to create new value propositions, enhance operational efficiency, and disrupt traditional competitive models. Case studies on tech giants like Amazon, Alibaba, and Google illustrate successful digital strategies, highlighting the importance of agility, customer-centricity, and data-driven decision-making.
