2. Condition: Categorized typically as Excellent, Good, Fair, or Poor.
3. Mileage: The total miles driven significantly influence value.

Types of Used Car Values Provided by KBB

KBB offers several valuation types tailored to specific scenarios:

1. Trade-In Value

This estimate indicates how much a dealer might offer a seller for the vehicle if trading it in for another car. It considers vehicle condition, current demand, and dealer margins. Trade-in values are typically lower than retail prices, reflecting the dealer's need to resell at a profit.

1. Private Party Value

The price you might expect when selling a vehicle directly to another individual. It tends to be higher than trade-in value, as it accounts for the buyer's and seller's direct transaction.

1. Dealer Retail Price

The estimated market value for a vehicle sold by a dealership, often including profit margins, warranty options, and additional services. This price tends to be higher than private party and trade-in values.

Each of these valuations provides critical insight depending on your goal—whether selling, buying, or trading-in.
