At its heart, Case in Point advocates a structured approach to tackling cases. The core methodology involves:

1. Clarify the problem: Fully understand the question and objectives.
2. Define the problem: Restate the problem in your own words.
3. Develop a hypothesis: Formulate a preliminary answer based on initial insights.
4. Structure the analysis: Break down the problem into manageable parts.
5. Analyze data and gather evidence: Use quantitative and qualitative methods.

This framework helps candidates avoid being overwhelmed by complex scenarios and promotes logical, step-by-step reasoning.

1. Common Frameworks and How to Use Them

3. Pricing Strategy Framework
4. Mergers & Acquisitions Framework
5. Growth-Share Matrix (BCG Matrix)
6. Porter's Five Forces

While these frameworks serve as guiding structures, Cosentino warns against rigid application. Instead, candidates should tailor frameworks to fit the specific nuances of each case.

Practical Application: The Case in Point Approach

Step 1: Clarify and Define

Candidates are encouraged to ask insightful questions to clarify the scope, objectives, and constraints of the case. This demonstrates active engagement and critical thinking.

Step 2: Develop a Hypothesis

Rather than jumping into analysis, form a preliminary hypothesis based on initial data. This sets a direction and guides subsequent analysis.

Step 3: Break Down the Problem

Create a logical structure, often using frameworks or custom charts, to organize the analysis. For example, a profitability case might split revenues and costs, then further dissect each component.

Step 4: Gather Data and Analyze

Interpret charts, financial statements, and qualitative information. Use mental math and estimation skills to validate or challenge hypotheses.

Step 5: Synthesize and Conclude

Summarize findings succinctly, ensuring that conclusions directly address the original problem.

Step 6: Present Recommendations

Offer practical solutions, supported by data, and communicate clearly and confidently.
