Understanding Self-Directed Learning

What Is Self-Directed Learning?

Self-directed learning (SDL) is an active form of education where individuals take the initiative to diagnose their learning needs, formulate goals, identify resources, choose and implement learning strategies, and evaluate their progress. Unlike traditional classroom settings where instructors guide the process, SDL empowers learners to take ownership of their educational experience.

The Importance of Self-Directed Learning

In a world where information is abundant and change is constant, being able to learn independently offers numerous advantages:
